SUCCESS STORY

Creating an innovative digital business culture

Portal de Documentos
uma empresa [B]³

The Portal de Documentos, a B3 Group company, achieved in a record time the migration to the cloud
of its main system in operation quickly, safely and without risk.

2 months to go live

Immediate cloud platform benefits.

Opportunity for more agile innovations

THE CHALLENGE

Perform the migration of the current core system to the cloud with zero risk and downtime negative impact on the operation.

- **On-premises software:** even running well, the on-premises system has a series of challenges, such as: high cost in management, more complex financial management, difficulty in gaining scale, difficult adaptation of database modeling.

THE ENGAGEMENT

Strategic definition of the best architecture for migration and involvement of the team and ideal partner for the project

- **Connected team:** high quality development team, working 100% in home-office during the pandemic.
- **Definition of cloud platform:** definition of AWS as the ideal partner, not only as a supplier but also as a strategic partner.
- **Agile implementation plan:** definition of the objectives and migration plan to reach the minimum term.

THE BENEFIT

Migration performed in a record time of 2 months and with the immediate benefits of a cloud platform.

- **Compliance:** evolution of compliance in accreditation
- **Security:** more robust security systems in line with GDPR
- **Better consumer experience:** increase in SLA
- **Managing made easier:** agile adaptation of database modeling and interactive dashboard
- **New products:** innovation based on new services compositions
- **Cost reduction:** moving from Oracle Enterprise to RDS Oracle STD bring economy of millions of dollars related to licencing costs and maintenance
